

MUHAMMAD UMER ALAM

FULL STACK DEVELOPER

129-E Block, Mohnalwal Scheme Society Defence Road Lahore, Lahore, Pakistan | umeralampklhr@gmail.com | +92 3026907967

Full Stack Developer who helps businesses—technical and nontechnical—turn ideas into fast, secure, easy-to-manage web products that save time and grow customers. I build React/Next.js frontends and Laravel APIs that have reduced page load time ~40%, increased organic sessions ~55%, automated billing to cut reconciliation time ~70%, and support reliable use for 200+ daily users—delivering clear communication, measurable results, and low-maintenance solutions.

PROFILE

Full Stack Developer specializing in React and Laravel, turning product ideas into scalable, secure web applications. Delivered production-ready solutions that reduced page load time by ~40%, increased organic sessions by ~55%, and supported 200+ daily CRM users through performant APIs and optimized database design. Experienced with Next.js, TypeScript, Tailwind CSS, MySQL/MongoDB, CI/CD and OWASP-aligned security—focused on measurable impact and reliable delivery.

AREAS OF EXPERTISE

- **Full-Stack Architecture:** Engineered scalable web applications by integrating modern JavaScript frontends (React.js, Vue.js) with robust PHP/Laravel backends.
- **Modern UI/UX Development:** Designed and deployed responsive, high-performance user interfaces utilizing Next.js, Nuxt.js, and Tailwind CSS.
- **Type-Safe Engineering:** Improved code maintainability and reduced runtime errors by implementing TypeScript across frontend components.
- **API & Data Management:** Facilitated seamless client-server communication and asynchronous data fetching using Axios and RESTful principles.
- **Database Design:** Structured and optimized relational databases using MySQL to support complex data relationships and secure application flow.
- **Build Optimization:** Streamlined frontend build processes and improved development server speeds utilizing Vite.

ACCOMPLISHMENTS

- Delivered a Next.js + Laravel platform with SSR/SSG, reducing average page load time by ~40% and achieving Lighthouse performance scores of 90+.
- Increased organic sessions by ~55% within three months through technical SEO, structured data, and performance optimization.
- Built secure, performant RESTful APIs and normalized database schemas to support 200+ daily CRM users and reliable concurrent usage.
- Engineered data-heavy CRM features (dynamic DataTables, advanced search/sorting), cutting user actions and data retrieval time by ~30%.
- Developed an automated commission engine and immutable payment records, reducing manual reconciliation time by ~70% and minimizing billing disputes.
- Introduced CI/CD pipelines, automated tests, and OWASP-aligned security controls to improve deployment stability and reduce incidents/rollbacks.
- Optimized frontend architecture (code-splitting, bundling, caching, Vite, TypeScript), lowering JavaScript payloads and improving Time to Interactive.
- Designed and implemented multi-layered role-based access controls and audit workflows to eliminate unauthorized access incidents and ensure compliance.

PROFESSIONAL EXPERIENCE

Full Stack Developer, Freelance

Dec 2025 to Present

Led end-to-end development of HealState.org using Next.js and Laravel, delivering a fast, SEO-friendly, and scalable web platform for community wellness tools.

- Implemented server-side rendering (SSR) and static site generation (SSG), reducing average page load time by ~40% and achieving Lighthouse performance scores of 90+.
- Improved organic search visibility and user acquisition, increasing organic sessions by ~55% within three months through technical SEO and structured data.
- Designed and built secure RESTful APIs and normalized database schemas to support high-volume community interactions and personalized features, enabling reliable concurrent usage.
- Optimized frontend performance with code-splitting, bundling, and caching strategies, lowering JavaScript payloads and improving Time to Interactive (TTI).
- Architected the application for maintainability and security, introducing automated tests, CI/CD pipelines, and OWASP-aligned security measures to reduce incidents and rollbacks.
- Collaborated with stakeholders to translate product vision into prioritized features and deliver production-ready releases on an iterative schedule.

Full Stack Developer, Freelance

Jun 2025 to Mar 2026

Built a configurable CRM focused on automation and complex business logic, supporting 200+ daily users and multi-source commissions.

- Engineered custom DataTables with dynamic column toggling, advanced search, and sorting, improving data retrieval efficiency and reducing user actions by ~30%.
- Designed and implemented a multi-layered permission system and role-based access controls, eliminating unauthorized access incidents in production.
- Developed a commission engine that calculates rates by ad source and role, automating payouts and reducing manual reconciliation time by ~70%.
- Implemented immutable payment records and automated job-status workflows to ensure auditability and reduce billing disputes.
- Adopted industry-standard testing and code-review practices under mentorship, increasing code quality and deployment stability.

TECHNICAL PROFICIENCIES

Languages & Frameworks:	PHP / Laravel, TypeScript / Next.js, React.js, Tailwind CSS
Backend & Architecture:	REST APIs, Role-Based Access Control (RBAC), CI/CD Pipelines, OWASP Security
Databases & Infrastructure:	MySQL / PostgreSQL
Tools & Practices:	Git / GitHub, Automated Testing, Code Review, Agile / Iterative Development

EDUCATION

**Unique High School & Academy Bahria Town Campus General education school,
Lahore**

May 2024 to May 2026

HSSC (Higher Secondary School Certificate)
Intermediate in Computer Science. Relevant: Computer Science, Mathematics, Physics. Graduation May 2026.

**Unique High School & Academy Bahria Town Campus General education school,
Lahore**

Jul 2022 to Jul 2024

SSC (Secondary School Certificate)
Secondary School Certificate. Completed July 2024.
